WORK EXPERIENCE

Fleet Feet, Mechanicsburg, PA, *Part-Time Outfitter*, May. 2026-Present
- Greet customers and assist them with finding the correct footwear
- Manage cash register and guest transactions
- Organize, review, and add merchandise into inventory
- Assist with online purchases and fulfillment

Eduplanet21, Mechanicsburg, PA, *Frontend Engineer*, Oct. 2024-Jul. 2025
- Delivered a customizable third-party WYSIWYG editor, improving collaborative content editing and user experience.
- Developed reusable Vuetify UI components and modernized legacy Vue2 components to Vue3 with Composition API.
- Implemented advanced JavaScript/TypeScript filtering for complex CMS data structures while ensuring legal compliance.
- Integrated ADA accessibility standards to improve usability and maintain compliance.
- Provided real-time technical support, resolved production issues, and managed helpdesk workflows while meeting SLA and customer satisfaction targets.
- Created technical documentation and delivered team training to help business and sales teams provide tailored user solutions.

Lumen Learning, Remote, PA, *Software Engineer*, Jan. 2022 - Jul. 2024
- Built a greenfield student assessment platform with Vue.js, JavaScript, and TypeScript, increasing faculty engagement by 20%.
- Developed an internal UI optimization tool that reduced debugging time from 15 minutes to under one minute.
- Designed and implemented REST APIs delivering real-time feedback, personalized resources, and seamless assessment experiences.
- Built reusable global components and functions using TDD, Vitest, and Axe DevTools to improve scalability, maintainability, and accessibility.
- Created technical documentation and training to standardize debugging, issue resolution, and feature onboarding processes.

Vanguard, Malvern, PA, *Application Engineer*, Jul. 2019 - Jan. 2022
- Applied TDD with Jasmine, JUnit, and Cypress to improve code quality, testing efficiency, and feature reliability.
- Collaborated with stakeholders and cross-functional teams to define requirements and deliver user-focused, strategic features.
- Developed web application features using Angular, Java, and Spring Boot to optimize functionality and support critical business operations.

EDUCATION

Gettysburg College, Gettysburg, PA
Bachelor in Computer Science, May 2019
